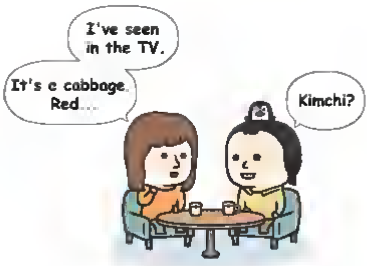
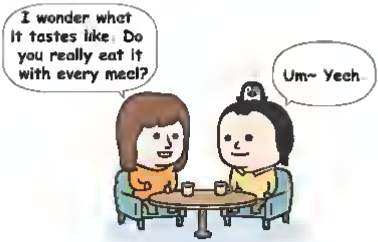
When we cook Korean BBQ

Through my experience,
I can tell that Korean food is
not familiar to British people.



I saw some people
who knew about Kimchi.



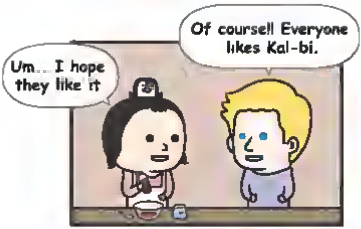
But still,
I haven't seen many people
who have actually eaten it.

So I love treating guests to Korean food.

Normally, the first meal that I prepare is...

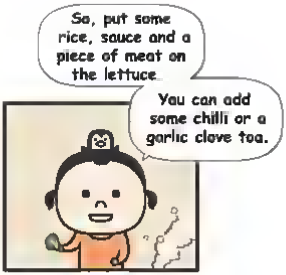
Sweet and salty marinated Kal-bi

*Kalbi: BBQ meat

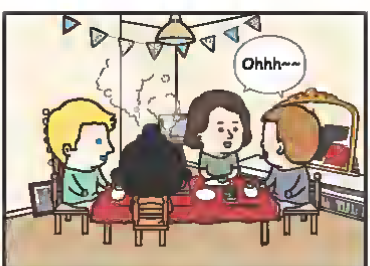


Because it is an easy but very safe dish.

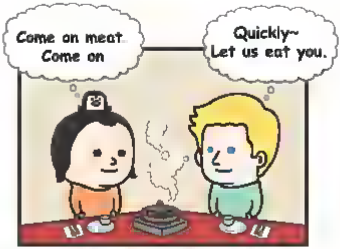
We cooked the meal on the dining table.



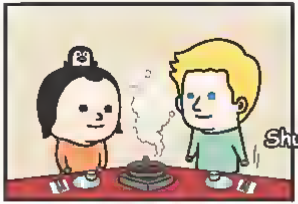
I explained how to eat the meat.



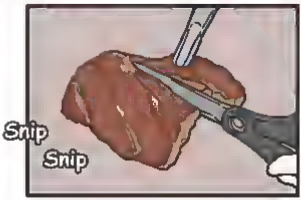
Then everybody got excited.



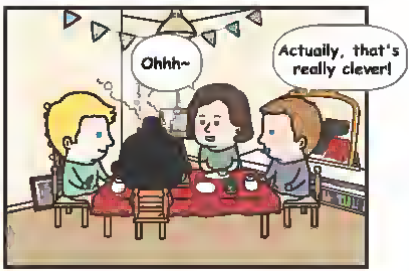
While I was excited by introducing this delicious meal, Mev was excited by something else.



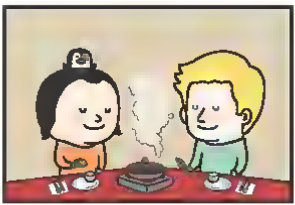
That something is this.



Cutting the meat by using scissars.



Whenever we cook a Korean bbq,...



we are delighted.
